

# Sustainability Statement

At WetNose, we are committed to sustainability, both offline and online. We do our best to ensure our website leaves the smallest possible digital ecological footprint. [www.wetnose.design](http://www.wetnose.design) is certified as green and has achieved an A+ score via the Carbon Calculator.

This high score is a direct result of our efforts to reduce our website's digital ecological footprint and its environmental impact. We focus on:

- Zero tracking for a minimal digital footprint and maximum visitor privacy.
- Efficient coding and design with PageSpeed and reduced data consumption as a guideline.
- Digital Declutter removing unnecessary clutter and scripts that require computing power.
- Minimal CO<sub>2</sub> emissions from our website and our online presence in general.

This is how we contribute to a more sustainable digital world. You can view the test results here : <https://www.websitecarbon.com/website/wetnose-design/>

This statement was created on March 1, 2026.

We remain committed to not only further reducing our own digital ecological footprint but also that of all the websites and webshops we build. We actively advise our clients on how to achieve the smallest possible digital footprint with their online presence..

The logo for WetNose, featuring the word "wetnose" in a lowercase, sans-serif font. The "wet" part is in orange and the "nose" part is in dark blue.
